2. Risk overview

EU standard classification

GB 13690-92 Classification of common dangerous chemicals

Not belong

Physical / chemical

SEM Risco de USO normal. hazard

Environmental hazard

The environment is harmful, may cause long-term adverse effects on aquatic environment.

The invasive route is inhalation, ingestion and transdermal absorption.

Health hazard Steam can cause drowsiness and dizziness.

The accumulation of steam will flicker or explode if it is

ignited.

Flame burst hazard This product is not flammable.

Printed in CHINA

Danger sign

3. Composition

| Ingredients | CAS # | Proportion |
|----------------------------------|-----------|--------------|
| Deionized water | 7732-18-5 | 60.0 - 85.0% |
| Green environmental cleaner | | 2.0 - 6.0% |
| Antirust and permeable additives | | 3.0 - 8.0% |

4. First aid measures

| Inhalation | Using appropriate respiratory protective device, the patient will be transferred immediately, if the patient stops breathing, artificial respiration should be carried out, and the rest is maintained and the medical care is carried out in time. • |
|--------------|---|
| Skin contact | Wash the place with soap and water. Take off contaminated clothes. Contaminated clothes should be washed with soap and water and then wear. |
| Eye contact | To wash the eyelids, with the flow of water or saline. Seek medical assistance |
| Eating | If the victim is lighter, drink 2-4 cup of milk or water. If the victim has lost consciousness, seek medical attention immediately. |

5. Fire control measures

The information in this publication is based on our experience and reports from customers. There are many factors outside our control an knowledge which affect the use and performance of our products for which reason the information in this publication is given without responsibility.

6. Accidental overflow handling measures

High temperature of the material, to Avoid human contact, if there is no danger, it is possible to stop and then overflow. With a mop or absorbent material will overflow into the proper container for further processing.

Quickly evacuate the contaminated area personnel to the safe area, and to isolate, strictly limit access. Cut off the fire source. Recommended emergency personnel wear self positive pressure respirator, wear protective clothing for firefighters. As far as possible to cut off the source of leakage, prevent access to sewers, flood channel limited space.

Small leakage

Adsorption or absorption of sand or other non combustible materials. can also be washed with plenty of water and diluted with water after washing into the waste water system.

Large leakage

Construct a barrierpit to contain; covered with foam, reduce the Vapor Hazard. Explosion proof pump transferred to tankexclusive collector, place the disposal of recycling or shipped to the waste disposal.

7. Operation disposal and storage

Closed operation, pay attention to ventilation. Operators must be trained in strict compliance with the operating rules. Stay away from fire, heat, smoking is prohibited in the workplace. Use explosion-proof ventilation system and equipment. To prevent vapor from leaking into the air in the workplace. Avoid contact with oxidizing agent. When transporting light light, to prevent damage to packaging and containers.

Operating notes

Mechanical equipment and tools that are prohibited from using the easy to produce sparks.

At the time of filling, we should pay attention to the velocity of flow (not more than 3m/s), and there is a grounding device to prevent the accumulation of static electricity.

Stored in a cool, ventilated warehouse. Away from fire and heat. The temperature in the warehouse is not more than 50. To prevent direct sunlight. Keep container seal. Should be separate from the oxidant. Storage room lighting, ventilation and other facilities should be used in explosion-proof type, switch located in the warehouse. Equipped with corresponding varieties and quantities of fire equipment. Bottled stacking is not too large, should stay away from the wall, from the top of column, and the necessary fire

Storage precautions

10. Stability and chemical reaction data

Stability Stable

Risk aggregation Will not produce

Avoid measures Strong oxidant, acid, amine, anhydride

Material attention No

The risk of material after decomposition

11. Toxicity data

EXPOSURE: Skin, eyes, inhalation, ingestion.

Acute toxicity:

Skin: Liquids can cause Skin Burns.

Eyes: Its vapor will dissolve in the water on the surface of the eye and cause irritation. INHALATION: stimulation of nose, Pharynx, eyeball and respiratory tract. High levels of steam can cause severe burns to the lips, mouth, pharynx and lungs.

INGESTION: Severe Burns to the internal organs.

LD50 (Testing the start-up, absorption pathway): --

LC50 (Testing the start-up, absorption pathway): 1108PPM/1H (Rat, inhale)

12. Ecological data

Ecological toxicity No data display

Environmental degradation No data display

13. Waste information

Waste method

The empty drum shall be recovered, regenerated or abandoned by the institution of a qualified or executing license, and be careful in any case to make sure that it is in conformity with the national laws and local regulations.

14. Transport information

Transport mode

Transport by ordinary product.

Packing method

Plastic barrels; plastic bottles; Metal bucket

The corresponding variety and quantity of fire fighting equipment and leakage emergency treatment equipment should be equipped with the corresponding variety and quantity of the transport vehicle.

It's better to transport early and late in summer. The tank (tank) used in transportation should be connected with the chain, and the holes can be arranged in the groove to reduce the vibration and generate static electricity.

Transportation matters needing attention

With no oxidant edible chemical conventional mixing luck. Transit should prevent accumulation of insolation, rain, high temperature resistant. Should stay away from the fire, heat, high temperature zone.

The vehicle exhaust pipe of the vehicle must be equipped with a fire resistance device, which prohibits the use of easy to produce sparks of machinery and equipment and tools for loading and unloading.

15. Regulation information

EU standard classification

Non combustible.

The classification of the product is carried out according to the test data of the whole or part of the product.

EU label

Risk characteristics

R26/27/28, R35.

Safety recommendations

S9; Place the container in a well ventilated place.

Printed in CHINA.

The information in this publication is based on our experience and reports from customers. There are many factors outside our control and knowledge which affect the use and performance of our products for which reason the information in this publication is given without responsibility.

S16; Stay away from fire, please do not smoke. S33; Take ESD preventive measures.

S36/37; Wear suitable protective clothing and gloves.

S57: Use appropriate containers to avoid environmental pollution

S60; This material and its container must be treated with hazardous waste.

S62; after eating do not induce vomiting: seek medical advice immediately and show this container or its logo.
