Nourishment for
Your Machines

TECHNICAL DATA SHEET

U tech Additives

Description:

High grinding additive is a kind of high conductive and non-toxic ultrafine powder. It can be applied to a mold with high mirror surface. Its high conductivity can reduce the electrical corrosion time by more than 30%. With the use of FUKKOL EDM PAHS, the grinding powder can be diffused fully in the oil, thus the mirror surface effect can be obtained.

Advantage :

- The machined surface is smooth and easy to be polished.
- The finishing time is appropriate.
- The side is easy to produce.
- Ordinary processing concentration: 1 grams / liter

Products Code	Packings	Capacity
I100052-4L	Can	4L
I100052-18L	Pail	18L
I100052-200L	Durm	200L

Typical physical properties

Appearance

Black powder

Particle size

Not greater than 1.5 μ m

Purity

Not less than 98%
