# TECHNICAL DATA SHEET

## VERA 9011 ALUMINUM STAMPING OIL

### Description:

FUKKOL Vera 9011 is a special oil with fast drying, strong lubrication and excellent rust resistance. It can improve the efficiency of high-speed punching machine, greatly improve the smoothness and accuracy of products, and extend the service life of metalworking oil. FUKKOL VERA 9011 is not only lubricity, cooling and antirust, but also volatilization quickly after punching, leaving very thin film to protect metal.

### Purpose :

It is used for high-speed punching shear, such as chip, mini motor shell, terminal, air conditioning heat dissipation network, electronic and computer parts, button shaped battery and other hardware parts.

Products Code	Packings	Capacity
I100175-4L	Can	4L
I100175-18L	Pail	18L
I100175-200L	Durm	200L

### Performance characteristics:

- Fast drying performance keeps light and will not stick or jam.
- Lubricity is very strong, making the processing surface bright, smooth operation.
- low viscosity and excellent cooling force.
- Prolonging die life.
- Good antirust performance, parts are not easy to rust.
- It has a high cleaning power and keeps the machine clean.

### Typical Physical Properties:

APPEARANCE	FLASH POINT °C	VISCOSITY 40°C mm <sup>2</sup> /s	DENSITY 25 °C , g/cm <sup>3</sup>	POUR POINT, °C
Colorless Transparent Liquid	≥100	1.5~3.0	0.75~0.85	<-30
