TECHNICAL DATA SHEET

EP ADD Stamping oil additive

Description:

The super extreme pressure agent content is 100%, which can satisfy all metal forming harsh environment, and can be used for stamping, stretching, cold pier, deep drawing and other requirements.

Products Code	Packings	Capacity
I100170-4L	Can	4L
I100170-18L	Pail	18L
I100170-200L	Durm	200L

Purpose :

All metal forming harsh environments can be used for stamping, stretching, cold piers, deep drawing, etc.

Performance characteristics :

- No sulfur, chlorine and phosphorus additives, environmental safety
- No effect on some nonferrous metals
- A wide range of uses, a variety of oil can reduce the stock of raw materials.

Typical Physical Properties

DENSITY g/cm ³	Flash point °C	VISCOSITY 40°C	Appearance
1.2~1.35	Not less than 110	—	Light yellow liquid

Matters needing attention:

1. Pay attention to sealing and preserving oil products
