# TECHNICAL DATA SHEET

## Conducting silicone grease

### Description:

Highly conductive silicone grease is a paste made of conductive filler and polysiloxane. It has excellent electrical conductivity and wide operating temperature range. ( $-50^{\circ}\text{C}$ — $200^{\circ}\text{C}$ ).

Products Code	Packings	Capacity
I100280-4L	Can	4L
I100280-18L	Pail	18L
I100280-200L	Durm	200L

### Purpose :

- It is suitable for lubrication of components such as power switches, high voltage contacts and so on.

### Performance characteristics :

- Excellent lubrication performance.
- Resistance to high temperature, high pressure, anti chemical corrosion.

### Typical physical properties:

Conductive silicone grease	NLGI	Coning 1/4	Drop point $^{\circ}\text{C}$	Appearance
—	5	28~40	>200	Black solid

### Matters needing attention:

1. Please use it in a suitable temperature range, so as not to cause the grease to freeze or melt.
2. Sealed storage.
