TECHNICAL DATA SHEET

Food grade anti-rust spray

Description:

The high food grade antirust agent is a non-toxic and FDA antirust lubricant, which is refined from a deep refining mineral base oil, an aluminum thickener and a very effective extreme pressure additive.

Purpose:

It is mainly used in non-toxic occasions such as door cabinet, gear and chain of food machinery, food, medicine, cosmetics, washing device, filling device, handling device and so on.

Performance characteristics:

- Good drainage and antirust property
- Good resistance to salt fog
- Removal of protective film by common deoiling method
- Flexible oil film
- Easy to use

Products Code	Packings	Capacity
I11994-500ML	Can.	500ML
I17994-18L	Pail	18L
I11994200L	Dum.	200L

Typical physical properties

Product	11994 Food grade anti-rust spray
Appearance	White opaque liquid
Density 25°C, g/cm ³	0.78
Copper corrosion 100°C 3h	1a
Antirust time	2 years (indoors)
Water solubility	Insoluble in water
Propellant	LPG

Matters needing attention

1. pressure vessels, avoid direct sunlight, stored at below 50 degrees Celsius.
2. should not be sprayed to the flame. Do not stamp or burn the container.
