TECHNICAL DATA SHEET

Aluminum cleaner

Description:

The high alumina cleaning agent is a high silicon aluminum alloy acid deoiling and degreasing whitening agent used at normal temperature. It is made up of a variety of compound acid, emulsification, dispersion and cleaning materials, soaking and ultrasonic cleaning. It can clean the black skin of silicon aluminum casting and the high silicon aluminum alloy surface after sand spraying, and it does not affect the surface of the aluminum alloy. The smoothness of the machined port.

Purpose:

Acid degreasing and degreasing and washing agent for high silicon aluminum alloy at room temperature

Products Code	Packings	Capacity
I100378-4L	Can	4L
I100378-18L	Pail	18L
I100378-200L	Durm	200L

Performance characteristics:

- Strong cleaning ability
- High degree of smoothness

Typical physical properties:

Aluminium cleaner	Relative density g/cm ³	PH VALUE	Appearance
—	1.06	≤1	Red liquid

Matters needing attention :

1. Do not contact with food.
2. Sealed and preserved.
3. Wear protective equipment, such as gloves, when used.
