TECHNICAL DATA SHEET

FUSICLEAN SYSTEM CLEANSER

Description:

The strong water carrying system cleaning agent does not contain nitrite. It is a powerful disinfectant for water soluble cutting fluid system. The special formula can clean dirt in various machine tools, and can be used in the normal operation of machine tools to reduce downtime. It is not applicable to the oil cutting fluid system.

Purpose:

It is suitable for various kinds of fouling in the system of cleaning coolant, such as oil accumulation and ground dirt, and it can also be sterilized, emulsified and scavenging the common scum in hard water.

Products Code	Packings	Capacity
I100324-4L	Can	4L
I100324-18L	Pail	18L
I100324-200L	Drum	200L

Performance characteristics:

- It can be used in normal operation of machine tools without affecting its normal operation.
- Strong antiseptic additive, effective disinfection
- Emulsified oil
- Permeable cleaners can remove bottom clean scum
- Containing corrosion inhibitors to reduce the rust of the workpiece
- Containing alkaline buffer, maintaining the pH value of the coolant

Typical physical properties

FUSICLEAN SYSTEM CLEANSER	Relative density g/cm ³	1% Water Solution PH Value	Appearance
—	1.05	9.0-10.0	Colorless Transparent Liquid

Matters needing attention:

1. The human body is not in direct contact with the product.
2. Sealed storage.
