TECHNICAL DATA SHEET

Repair clay

Brief introduction:

All adhesive can be well adhered to metal, wood, stone, plastic, glass, jade and ceramics, which can be used for simulating the workpiece and printing. It can be used in water as well.

Purpose:

Toys, glasses, watches and clocks, styrofoam products, hand plate making, and maintenance industries are used for thousands of different purposes.

Mix the two kinds of all purpose glue with light yellow and white in the ratio of 1:1 until they turn gray. It must be used in 15 minutes.

All the glue becomes hard as stone in 3 hours, and it can drill, sawn and polish. All treated adhesives can be sprayed or coated with various paints.

Advantage:

- Unique sticky nontoxic formula.
- Wide use.

Typical physical properties

Repair glue	Relative density g/cm ³	PH	Appearance
—	—	—	Light yellow / white solid

Matters needing attention:

1. Do not contact with food.
2. Sealed and preserved.
