

**DAC 2 Rust Remover** 100078

**Description**  
Fukui DAC 2 is a special rust-removal formula which provides effective protection against rust and may also remove rust. It is used to remove the staining, rusting or staining.

**Application**  
Load for general treatment of metal surfaces, including rusted and pitted aluminum and its alloys and moldings, including aluminum and stainless steel. Also applicable for cleaning, restorative and maintenance equipment, cleaning life and quality.

**Benefits**  
DAC 2 has acid setting and penetrating ability, making it effective in a wide range of temperatures. DAC 2 special rust-removal formula can also remove rust, even after large amounts of rust and corrosion have been removed. DAC 2 is easy to use and contains no hazardous.

**Cleanology** CL-FU-4442

**Description**  
Fukui CLEANLOGY DRY STAIN CLEANER is a powerful stain remover that is required to remove stains from walls and floors. The professional-grade stain remover is a powerful stain remover that is required to remove stains from walls and floors. It is a powerful stain remover that is required to remove stains from walls and floors. It is a powerful stain remover that is required to remove stains from walls and floors.

**Application**  
1. Put Cleanology Dry Stain Cleaner on a clean surface. 2. Rub the stain with a clean cloth. 3. Rinse the surface with water. 4. Repeat the process until the stain is removed.

**Machinery Powerful Detergent** 100384

**Description**  
Machinery Powerful Detergent is a powerful machine detergent that is suitable for use in self-contained and centralised systems. The product has been specifically developed for the machinery industry. It is a powerful machine detergent that is suitable for use in self-contained and centralised systems. The product has been specifically developed for the machinery industry.

**Application**  
1. Dilute with hot or cold water (100:1 ratio). 2. Apply the solution to the machinery. 3. Rinse the machinery with water. 4. Repeat the process until the machinery is clean.

**CPS Sticker Remover** 100516

**Description**  
Fukui Sticker Remover CPS is designed for removing problem of stickers. It leaves no sticky residue, harmless to people and affects no any work processing.

**Application**  
1. Do not apply to food. 2. Long time after contact may cause skin irritation. 3. Use 1:10 water/dilution ratio. 4. Keep away from source of ignition.

**Super Glue Remover** 100329

**Description**  
SUPER GLUE REMOVER may be applied directly to the cured adhesive surface and does not run or migrate. Allow sufficient time to penetrate and then begin rubbing, brushing, or sanding off softened adhesive layers. General application may be required to remove thick deposits of the adhesive. The parts may be soaked in the SUPER GLUE REMOVER as an alternative method. Always use SUPER GLUE REMOVER in a well-ventilated area.

## Stain Cleaner

**Electronic Cleaner** 77438

**Description**  
Fukui Electronic Cleaner is a unique blend of alcohol, distilled water and alcohol. It is a unique blend of alcohol, distilled water and alcohol. It is a unique blend of alcohol, distilled water and alcohol.

**Application**  
1. Spray the solution onto the electronic components. 2. Wipe the components with a clean cloth. 3. Repeat the process until the components are clean.

**Mould Cleaner** 11168

**Description**  
Fukui Mould Cleaner is a cleaning agent that is mild and non-harmful. It is a cleaning agent that is mild and non-harmful. It is a cleaning agent that is mild and non-harmful.

**Application**  
1. Spray the solution onto the moulded surfaces. 2. Wipe the surfaces with a clean cloth. 3. Repeat the process until the surfaces are clean.

**Mould Cleaner** 15548

**Description**  
Fukui Mould Cleaner is a cleaning agent that is mild and non-harmful. It is a cleaning agent that is mild and non-harmful. It is a cleaning agent that is mild and non-harmful.

**Application**  
1. Spray the solution onto the moulded surfaces. 2. Wipe the surfaces with a clean cloth. 3. Repeat the process until the surfaces are clean.

**FOOD GRADE CLEANER** 11632

**Description**  
Fukui FOOD GRADE CLEANER is a food-grade cleaning agent that is safe for use on food surfaces. It is a food-grade cleaning agent that is safe for use on food surfaces. It is a food-grade cleaning agent that is safe for use on food surfaces.

**Application**  
1. Spray the solution onto the food surfaces. 2. Wipe the surfaces with a clean cloth. 3. Repeat the process until the surfaces are clean.

**Metal Polish Compound Oxide Remove** 120132

**Description**  
Metal Polish Compound Oxide Remove is a powerful metal polish that is suitable for use on metal surfaces. It is a powerful metal polish that is suitable for use on metal surfaces. It is a powerful metal polish that is suitable for use on metal surfaces.

**Application**  
1. Apply the polish to the metal surface. 2. Rub the surface with a clean cloth. 3. Repeat the process until the surface is clean.

**Wax Remover** 120353

**Description**  
The wax remover is refined from the imported surfactant which has strong degreasing action, effective accessory ingredient etc. having advantages of fast, thorough and enduring wax removing, oil removing without damaging the substrate, long service life, non-toxicity and low foam being biologically degraded from sewage, etc. Application method: all waxed cleaning steps for solution preparation, it is required to add the water into a clean trough when the water is heated to 60°C, add wax remover slowly while stirring and stir the solution sufficiently and evenly, and finally heat it to the required temperature for use.

**Paints & Lac Paint Remover** 100078

**Description**  
Paints & Lac is soaked at normal temperature for use, which is convenient, time-saving, and with fast dissolving speed. It is a convenient, time-saving, and with fast dissolving speed. It is a convenient, time-saving, and with fast dissolving speed.

**Application**  
1. Soak the workpiece in the paint remover. 2. Wipe the workpiece with a clean cloth. 3. Repeat the process until the workpiece is clean.

**100372 External Wall Power Cleaner**  
FUKKOL EXTERNAL WALL CLEANER Concrete Cleaner is specially formulated to remove common contamination and surface dirt staining. It is a heavy-duty cleaner, including inorganic architectural and light-duty concrete, masonry, masonry, concrete, and stone. It is a heavy-duty cleaner, including inorganic architectural and light-duty concrete, masonry, masonry, concrete, and stone. It is a heavy-duty cleaner, including inorganic architectural and light-duty concrete, masonry, masonry, concrete, and stone.

**100378 Aluminum Cleaner**  
FUKKOL ALU CLEANER is a heavy-duty metal cleaner, including inorganic architectural and light-duty concrete, masonry, masonry, concrete, and stone. It is a heavy-duty cleaner, including inorganic architectural and light-duty concrete, masonry, masonry, concrete, and stone.

**100380 Auto Cleaner**  
FUKKOL AUTO CLEANER is a professional copper equipment cleaner with organic and acid active formula. It is designed for copper equipment and stainless steel equipment, which is heavy-duty in industrial and household use.

**100373 Floor Powerful Cleaner**  
FUKKOL FLOOR HEAVY DUTY CLEANER is a concentrated liquid kind of alkali material, surface and stainless steel will transform deposits into the form of a fine material, easily flushed away. This new product is formulated to remove safe and effective features.

**100367 Ultrasonic Detergent**  
FUKKOL Ultrasonic Detergent is a highly concentrated, aluminum salt-based, metal-capturing detergent, formulated for the ultrasonic cleaning of the toughest contaminants on all metal. Specially in bicycle chain deep clean and oil removal.

**100352 MIKI Wax 100**  
MIKI Wax 100 is made from advanced cleaning formula, it may clean effectively dirt, wax and alloy from metal floor and wood furniture. With special additive to keep furniture clean and a good condition when use it often.

**100370 Gummi Disinfecting Hand Cleaner**  
Painkiller Hand Cleaner is a natural, strong protein hand cleaner, petroleum solvents. It cleans hands easily. It is a heavy-duty cleaner, including inorganic architectural and light-duty concrete, masonry, masonry, concrete, and stone.

## Water Tower Treatment

### Tower Maintain B 100323

As to water tower, the usual problems lie in the not circulating system, mineral and bacteria growth in the water which may agglomerate and adhere around the vertical and the diaphragm as a block to make the circulating system abnormal and lack of heat dissipation. As a result, the water temperature will rise and the tower will lose cooling function; thus, more heavy maintenance will be required.

#### Maintenance

Actually, tower maintenance will become very easy after the above problems are removed. In most professional skills, currently, our company provides two kinds of maintaining products: economic and effective, specially designed for maintaining tower cooling system so as to prolong the life of the water tower system.

#### Application method

No matter the tower is old or new, just add the product in certain amount according to the Cleaner Preparation Table to the water and make the water circulate for one day, and then discharge the used water, and add clean water. As the protective agent in certain amount according to the Cleaner Preparation Table to the water for next circulation. Thereafter, it is only required to add (5) protective agent for heat dissipation every four to seven months to get the tower perfect maintenance for a long time.

### Air Condition Radiator Cleaner 100385

FD-24 Air Conditioning Coils Cleaner is a viscous liquid which has been formulated specifically for cleaning and brightening stainless steel and aluminum trim, window frames, storm windows, screening and air conditioning coils. The product will not etch glass, so no masking is necessary.

### Tower Clean A 100322

Tower Clean A is an acidic liquid which can be used to remove special water scales such as water scale, oxides, etc., without etching any metal materials in acid cleaning.

Tower Clean A is specially used to eliminate the special water scales in circulating cooling system, heat exchange system, condenser, etc.

### Fungicide 100326

FUKKOL Fungicide can be used with all types of water mix metal working fluids. It is formulated to eliminate fungus and prevent the formation of fungal growth which can cause blockages and lead to costly downtime.

### FUSICLEAN System Cleaner 100324

FUKKOL FUSICLEAN System Cleaner is a mild free medium to heavy-duty machine tool cleaner and sterilizer. Based upon a powerful detergent, it has been specifically formulated to deal with a wide variety of machine tool contaminants and is easy to use with minimum disruption to production, being added direct to the coolant system whilst still in operation. Not applicable to neat oil system.

### Fungicide 100326

High mould inhibitor can be dissolved in various forms of water and can be used in metal products. It can eliminate fungi or prevent fungal growth, and control the blockage caused by bacterial growth, thus improving work efficiency.

### Anti Foam X 100318

FUKKOL Anti Foam X is modified dimethyl siloxane with the characteristics of non-volatile, non-toxic, odorless. It is a milk-white liquid and insoluble in water. It can be dissolving in organic solvent, such as aliphatic hydrocarbon, with well heat stability (stable under 200°C). It has well anti-foaming effect with little dosage.

### Bactericide 100325

FUKKOL Bactericide is a nitrite-free medium to heavy-duty machine tool cleaner and sterilizer, based upon a powerful detergent. It has been specifically formulated to deal with a wide variety of machine tool contaminants and is easy to use with minimum disruption to production, being added direct to the coolant system whilst still in operation. Not applicable to neat oil system.
