TECHNICAL DATA SHEET

WIRE ROPE & CHAIN OIL

Purpose :

High steel cable & chain oil is a high performance lubricating oil designed for the conveyance device which is conveniently equipped with roller and chain. The lubrication of the chain can effectively brake the machine operation and is especially suitable for the automatic lubrication system. Excellent extreme pressure additives can penetrate into the cable core thoroughly and lubricate, and provide a high load capacity to transport, reduce wear and tear, and extend the life of the cable or chain.

Products Code	Packings	Capacity
I100050-4L	Can	4L
I100050-18L	Pail	18L
I100050-200L	Durm	200L

Purpose :

High chain steel chain oil is designed for automatic lubrication system and can be used in accordance with lubricant product specification.

Apply the brush directly to the chain or oil the oil device.

Performance characteristics :

- Good resistance to high load
- Good anticorrosion
- It is not easy to drain when it is used
- Long term and effective lubrication in the range of high temperature

Typical data

Appearance :	Brown and yellow transparent
Pour Point, ° C	<-21
VISCOSITY, 40° C	198~242
VISCOSITY INDEX	Not less than 100
Temperature range :	-15°C to+250°C

Matters needing attention:

1. Pay attention to sealing and preserving oil products
