产品描述及数据参数

VERA 9300 COPPER & ALUMINUM BENDING OIL

Description:

- High VERA 9300 two elbow oil is a special oil with fast drying, strong lubrication, excellent rust resistance and cooling power. It can improve the efficiency of high-speed punching machine, greatly improve the smoothness and accuracy of products, and extend the service life of metalworking oil.

- High VERA 9300 is not only lubricity, cooling and antirust, but also rapidly volatilization after punching, leaving very thin film to protect

metal.

Purpose :

It is used for high-speed punching shear, such as chip, emblem motor shell, terminal, air conditioning heat dissipation network, electronic and computer parts, button shaped battery, other hardware parts.

Performance characteristics :

- Fast drying performance keeps light and will not stick or jam.
- Lubricity is very strong, making the processing surface bright, smooth operation.
- low viscosity and excellent cooling force.
- Prolonging die life.
- Good antirust performance, parts are not easy to rust.
- It has a high cleaning power and keeps the machine clean.

Products Code	Packings	Capacity
I100185-4L	Can	4L
I100185-18L	Pail	18L
I100185-200L	Durm	200L

Typical physical properties

DENSITY g/cm ³	FLASH POINT °C	POUR POINT °C	VISCOSITY 40°C	Appearance
0.8~0.85	≥100	<-30	2.0~3.0	Colorless Transparent Liquid

Matters needing attention:

1. Pay attention to sealing and preserving oil products
2. This product is flammable
