# TECHNICAL DATA SHEET

## COPPER CLEANER

### Description:

High copper cleaning agent is a kind of compound organic acid type copper cleaning agent. It is characterized by high descaling rate and low corrosion rate. It is suitable for cleaning brass, copper and bronze, and has the effect of removing oil, deoxidizing skin and brightening after washing.

| Products Code | Packings | Capacity |
|---------------|----------|----------|
| I100050-4L    | Can      | 4L       |
| I100050-18L   | Pail     | 18L      |
| I100050-200L  | Durm     | 200L     |

### Purpose:

An oxide film that removes the surface of the copper.

### Performance characteristics:

- Removes mild oils, fingerprints and oxides.
- No phosphate or chromate.
- It is easy to wash with water to avoid excessive pollution.

### Typical physical properties:

| COPPER CLEANER | Relative density g/cm <sup>3</sup> | PH VALUE | Appearance |
|----------------|------------------------------------|----------|------------|
| —              | 1.06                               | ≤1       | Red liquid |

### Matters needing attention :

1. Do not contact with food.
2. Sealed and preserved.
3. Wear protective equipment, such as gloves, when used.
